## **Professional Summary**

Self-motivated technology leader and a change agent with over 12 years of experience including individual contributor, lead and management roles in Data warehousing, Analytics and cloud architecture.

Demonstrated technical leadership in implementing business intelligence solutions through entire project life cycle - Conceptual design, tool selection, requirements, re-engineering, design, development and post production support.

## **Technical Summary**

- AWS EMR, Redshift, DynamoDB, QuickSight, Machine Learning, S3, EC2, & RDS
- Informatica PowerCenter, Data Quality, DIH and MDM
- SnapLogic Elastic Cloud Platform
- Data Discovery & Analysis
- ETL Design & Development
- Project Management and Service Delivery
- ITIL Continual service improvements
- ITIL Service Operations
- Service-Now & BMC Remedy

## **Certifications**

- Amazon Web Services: **AWS Certified Big Data Specialty**: Oct 2017
- Amazon Web Services: **AWS Certified Solutions Architect - Associate**: Sept 2017
- Scrum Alliance: **Certified Scrum Master**: 2017
- Crest Point Solutions: **Performing Leads 1**: Project Management, 2015
- Exin: **ITIL V3 Foundation & Service Operations**: IT Service Management, 2013

## **Experience**

### **Analytics & Integration Architect**

*Cognizant Technology Solutions (2015-Present)*

**Client:** Amgen Inc.

**Project Abstract:** Amgen ARM BI is a project to provide operational support, and functional enhancements to Amgen's critical BI Application and platform landscape.

- Successfully delivered data/software migration projects including Oracle to Exadata, SSIS to Informatica and Dataflux to IDQ migrations.
- Successfully delivered software lifecycle upgrade projects including Informatica PowerCenter and Data Quality upgrade
- System Owner of Data Integration and MDM platforms that include Informatica PowerCenter, Data Quality, Data Integration Hub, MDM and SnapLogic Elastic Cloud platform
- Oversee design, implementation and manage day to day platform operations
- Created daily reports for team to showcase incident and service request aging.
- Significantly contributed in creating automated impact analysis tool that gives improved turn around time for delivering analysis results for Informatica and BOBJ
- Build data pipelines using SnapLogic to ingest data into S3, Redshift, Hive and HDFS.
- Prepare and maintain communication materials: Proof of Value (POV), roadmaps, position papers, presentations, demos, playbooks and socialize the materials with business clients and partner IS services
- Manage continual service improvements across all Data Integration and BI platforms and providing direct and indirect cost benefits to Amgen
- Leveling skills by working on [AWS Projects](#), Python and Visualization tools.

### **Project Manager**

*Cognizant Technology Solutions (2011-2015)*

**Client:** Merck & Co.

**Project Abstract:** Merck AMS Lights on DWBI project provides maintenance and operations support to all the divisions of Merck & Co.

- Maintain high performing service support functions for ETL and BI platforms, managed 2M annual revenue.
- Took ownership of major incidents ensuring coordination of resolving parties, effective communication to stakeholders and post incident review
- Created “Zeus” an Informatica application monitoring tool which relies on Informatica metadata, has its own data model, interacts with multiple repositories and transforms/stores extracted data for reporting.
- Successfully delivered minor and major ETL enhancement projects for Merck locations in USA, Japan, China and EMEA

- Reduction of 122 change requests, 24 Critical and 52 High priority incidents per year using “reduction in demand” CSI theme
- Automated day today platform activities across ETL and BI platforms using “Improving productivity” theme to onboard 44 new application to support scope without increasing team size.
- Owner of the Incident, Request, Change and Escalation processes, ensuring high levels of performance in these processes, accurate reporting and establishing service improvement activities when required
- Project area representative for Internal & External audits
- Developed a learning plan, set individual goals & tracked results for team

### **Project Lead & Technology Specialist**

*Cognizant Technology Solutions (2006-2011)*

**Client:** Merck & Co.

**Roles:** Multiple roles including but not limited to ETL Developer, ETL Lead, Consultant and Administrator.

- Involved in high level and low level ETL design, development activities
- Create mappings employing various transformations, filters, joiners, lookup, SQL overrides etc to load data from multiple databases into Warehouse
- Installed and configured PowerCenter 8.6 and 9.1 on HP UNIX and RedHat Linux platform
- Upgraded PowerCenter from 7.x to 8.x and 8.x to 9.x PowerExchange installation, configuration and registration
- Established connectivity to various types of data sources such as SAP, SFDC, JMS, Teradata (TPT), DB2 on mainframe and LDAP Authentication
- Automation of day to day operations like weekly domain and repository backups, analyze metadata, Truncate Logs, Informatica folder creation, new project initiations, Code deployments, Disk Space management & alerting

### **Awards**

- **Performance Award - 2016:** By Exec Director Global Business Services Amgen in recognition of commendable performance, passion and exceptional commitment to the Amgen Application Run Management
- **Certificate of Achievement - 2016:** By Director Analytics and Business Intelligence Amgen for outstanding achievement

### **Education**

- **Bachelor of Electronics Engineering (2003)**  
Walchand College of Engineering
